## **Prescription Drug Transition Worksheet**

Use this worksheet for your own personal reference to make sure you're prepared to get your prescriptions. Fill out a separate worksheet for each medication.

My Medication Name:	My Prescription Number/Identifier:
Call your insurance carrier for answers to	these questions:
? Is my medication on the formulary? If not, how much more will I have to pay?  Notes:	? Are there any quantity limits?  Notes:
? How much will a 30-day supply cost? How much will a 90-day supply cost? Notes:	? Is pre-authorization required? If so, what information will my doctor need to provide for my medication to be covered? Where can I find any forms that need to be completed?  Notes:
? Will I have to pay a penalty if I choose a brand name drug if a generic is available?  Notes:	? How do I find an in-network pharmacy?
? Is my drug considered preventive?  Notes:	? How do I set up mail-order prescriptions?
? Will I have to go through a step therapy program (see right)? If so, what alternative will I have to try before my	What is a step therapy program?

## Did You Enroll in Bronze Plus or Silver?

medication is covered?

Notes:

If so, when the new plan year begins, you'll pay the **full** cost of a drug's discounted rate until you meet the combined medical and prescription drug deductible. If you or a covered family member takes maintenance medications, you can take steps to protect your health and your wallet now.

For starters, keep taking and refilling your medication as directed (as always).

Then, if you or a covered family member takes a brand name drug, consider these ways to lower your costs:

## Make sure your prescription is on the formulary.

A **formulary** is a list of generic and brand name drugs that are approved by the Food and Drug Administration (FDA) and are covered under your prescription drug plan.

If this applies to one of your medications, it means that you'll need to try using the most cost-effective version first—usually the generic. A more expensive version will only be covered if the first drug isn't effective in treating your condition.

Check with your carrier to make sure your drug is listed on the formulary **before** you fill it. If it isn't, you'll pay more.

Go generic. Generic drugs meet the same standards as brand name drugs, but they typically cost less. And, you will pay an additional cost if you get a brand-name (Tier 2 or 3) drug when a generic equivalent is available. Ask your doctor if a generic is available to you.

Use mail order. Mail-order service can save you a trip to the pharmacy and may reduce your costs. To set up mail order with a new medical insurance carrier, you'll likely need a new 90-day prescription from your doctor. And, because mail order can take a few weeks to establish, it's a good idea to ask your doctor for a 30-day prescription to fill at a retail pharmacy in the meantime.
